

CLEAN BOATS CLEAN WATERS PROGRAM EXPANDS FOR 2018

For 2018 NSTLRA has expanded its efforts by increasing the aquatic invasive species (AIS) prevention education of boaters and the monitoring of boat launches on the Twins. Last September the Board of Directors authorized the seeking of additional grant funds from the Wisconsin Department of Natural Resources. In early 2018 NSTLRA got word that our increased grant request was approved. Consequently, our Clean Boats monitoring efforts will be expanded by almost 50%. In addition, for the first time ever, a second landing has been added to our monitoring. While the primary monitoring efforts remain centered at the North Twin landing, off of Highway 17, behind Phelps Convenient Store, the additional hours have been allocated to the Lakota landing on the West shore of North Twin, off of Highway K. Interns from the University of Wisconsin Oshkosh will again be providing these services, 75% of the cost is covered by our DNR grant with the remainder being assumed by the lake association.
